MISCELLANEOUS BULBS

AMARYLLIS, Giant American. Of all bulbs which the amateur can grow successfully indoors, the Amaryllis produces the largest, most beautiful flowers, is surest to bloom, and the most easily handled. Our new hybrids, especially, are so large and gorgeous in coloring as to amaze those not familiar with them. From a single stem spring from one to four lily-like flowers, 6 to 8 inches in diameter. Place only one bulb in each pot, covering as far as the neck or upper narrow part. Water sparingly at first until the flower shoots begin to appear. Some growers keep them in the dark until the flower-stems are 4 to 5 inches long, and then bring to light. After flowering they should be placed in a warm window, or set outside in sand or cinders and watered every day (sometimes twice a day), until the end of August when water should be gradually withheld and the bulbs allowed to rest. In the fall they can be forced again as with new bulbs. Blooms in February. Do not deny yourself the pleasure of having these beautiful flowers. Send your order now, today. **50c each, \$5.00 per doz.** Delivery after November 1.

ANEMONES, French or Poppy-flowered, Mixed. Contains a wonderful range of colors, including blue, rose, white, scarlet, etc. Jumbo size, **10c each, \$1.00 per doz.**
